

WINDHAGER LOGO HERE

Windhager pellet boilers heat your home with pellets. the BioWIN2 is a reliable pellet boiler providing long-term, carefree, and reliable heating. Windhager have 500 million operating hours of experience with pellet boilers, and have spent almost a century developing innovative wood heating systems.

With all of this expertise, they have developed the BioWIN2 as a low pellet consuming and efficient boiler even in its lower output range. Therefore, a buffer is not usually needed. The ignition device is critical for the trouble-free operation of a pellet boiler, which is why this unique element, specifically designed by Winhager, is extremely durable, maintenance free, and ignites silently.

Benefits of a Windhager BioWIN2

- Minimal space requirements
- Long maintenance intervals
- Robust stainless steel burner with LowDust technology
- Self-cleaning
- No buffer required
