

Hwam 3610 Installation

Customer Aspiration: A way to combination traditional fireplace with a contemporary curvy stove

Combining the ultra-traditional with the ultra-Modern is not the easiest thing to do and doesn't always work however the curves of the [Hwam 3610](#) woodburning stove with its wonderful big door work perfectly with the curves of the old cob walls and fireplace. It fits perfectly in the inglenook leaving lots of room for a pile of logs and the spy hole into the lounge!
