

Contura 51L woodburner at Retallack Resort, Cornwall

Customer Aspirations: Retallack Resort and Spa are in the process of updating a number of their holiday homes. To increase the warmth and cosiness of their accommodation their priority was a woodburner. They need something suitable for the space, freestanding, modern and clean.

The [Contura 51L](#) was a good choice for the resort. The chimney breast is made from our metal framework clad in fireproof board using twin walled flue to create a classic looking fireplace in the corner of the room. Retallack Resort and Spa have also installed the Contura i4 in other lodges to give a totally different effect. Adding the woodburners to their holiday homes in Cornwall has helped their properties appeal throughout the year
