Contura I4classic in traditional stone fireplace

Customer Aspirations: Modernise the traditional fireplace

Customer Requirements: Do not disturb the fireplace but replace the existing open fire

The Contura I4 is made specifically to fit into a traditional Milner opening without any major building works. Once the Milner brick is removed and the flue relined the fire is popped into place and attached to the new flue system. Great care was taken not to damage the existing fireplace whilst work was carried out.
