

Double sided wood burner in Cornwall, Stuv 21

Customer Aspirations: Double sided fireplace

Customer Requirements: Two completely different looks on each side.

The Stuv 21 double sided is a large output fire which was set into the wall. The air vents are made to measure and powder coated to match the fire. One side of the fireplace is painted white plaster. On the other side the wall has been clad in stone creating a totally different look. It's lovely to have some pictures of the room finished.
