

# Rais three sided woodburner installed in Cornwall

Customer Aspiration: A clean modern and stylish fireplace

Customer Requirements: The home was a new build and so Kernow Fires needed to liaise with the construction company Sprout to ensure regulations and design

The fireplace is the focal point of the large open plan area which has been carefully decorated to ensure that when lit the fire creates a warm glow in the mostly white room. The Rais is the perfect fire for this clean living modern home and with Kernow Fires inset vents, the clean lines are not disrupted.
