

Jotul FS 91/92

A lightweight concrete encloses the firebox from the F470 series resulting in a slender and round fireplace shape. The use of Olivine in the production means the heat is given off for a long period of time. The concrete surround may be painted to compliment any room setting.

Specifications

Height: 1570mm

Width: 525mm

Depth: 480mm

Output: 6kw
