

Dru Excellence 50XT Eco Wave

DRU Excellence 50XT. The high end, balanced flue gas fire experience with unique dual burner.

Excellence gas fires are available in 3 sizes, M, L and 50XT. They are large fires with authentic log fire beds and interior finishes in smooth black, natural stone or grey slate finishes. The stone finishes are also available as special pillars that can be fitted on both sides of the glass window at the front of the fire. This creates a seamless effect and gives the illusion of a completely open fire.

Another innovation is the DRU dual burner. This allows you to use your remote control to switch between two separate flame settings, each of which can be adjusted to high or low flame pictures. So you can change the appearance and the heat output of the fire to suit the time of year and ambient room temperature.

DRU Excellence gas fires can be combined with a selection of contemporary outer frames or classic fire surrounds to suit the style of living room and give the fire an even more dramatic presentation. They are the ultimate, luxury gas fires for contemporary living.

Specifications

Height: 1432

Width: 680

Depth: 360

Fuel: Gas

Output: 3kw - 8kw

Efficiency: 85
